Their Last Hours on Earth Were Passed in Feasting.

McCarthy is the First One to Be Hanged Followed Closely by Craig-McCarthy Made the Trip in Thirteen Minates and Craig in Twelve.

COLUMBUS, Q., Sept. 2.—Edward Mc-Carthy and Charles Craig, the former white and the latter colored, Cincinnati murderers, were hanged in the penitentiary annex early Friday morning. When the spectators entered the execution room Warden James, Assistant Deputy Stackhouse and Guard Grump wery standing as motionless as ghostly pieces of statuary. They were joined by Deputy Playford, while the small crowd arranged itself in readiness for the horrible spectacle. It was just 12:00 o'clock when a muffled "Good-by" was heard in the adjoining room as the leave-taking of Craig and McCarthy took

onto the scaffold, pressed the crucifix to his lips. The murderer kissed it reverently. Warden James, who stood with his hand on the lever of the trap, at this point said: "Mr. McCarthy, if you have any statement to make, now

you good-by, all and all." In his excitement he made a mistake,

for what he evidently intended to say was "one and all." Continuing, he said: "If I have done any one an injury I hope they will forgive me. I ask God to forgive all my sine, and hope to meet you in Heaven." Just after he uttered the last word the black cap was adjusted and the rope placed around the neck by Deputy Playford. The noose was carefully adjusted, and at a signal from the deputy the warden pulled the lever. McCarthy shot through the trap at precisely 12:12%.

audible as he went down. His body swung once around after the seven-foot Then a ghastly scene occurred, for Edward McCarthy died a hard death. The black cap had caught in the noose in going down and jerked the knot around to the back of his head. He slowly strangled to death, while his legs jerked convulsively up and down, his finger tips pressed into the palms of his hands with a deathly grip. A choking sound from his throat was plainly audible, while his breast heaved spasmodically in efforts for breath. One moment after the trap was sprung McCarthy's respiration was seventyseven. It ran up to 114 and then dropped back to ninety-nine a moment later. Again it reached 111, and then slowly declined until he was pro-

His body was quickly cut down, and when the black cap was removed a dark-blue mark encircled the throat The neck was not broken. McCarthy was just twelve and one-half minutes in dying, which is a remarkably short period for a person strangling. His

was pronounced dead the trap was sprung under Craig. The removing of the rope from McCarthy's neck, the bearing away of the remains, the readjustment of the scaffold, the soaping of the rope to make it slip easy for the next victim, was all accomplished with remarkable skill and dispatch.

The same assistants as before at once prepared for their ugly work a second time. Craig kissed the crucifix and then shook hands with all on the scaffold, saying "Good-by" to each. He then kissed the crucifix again and the work of pinioning his arms and legs was quickly performed. He stood without a quiver. "Now, Craig, if you have any thing to say you have this opportunity.

The condemned man, with choking voice, responded: "No nothing. I for give every body and I want every body

to forgive me. That was all He stopped talking, and his last words were spoken.

The work was completely successful. There was no twitching, or jerking, or gurgling sounds, as marked McCarthy's death. His neck was broken, and he evidently suffered no pain. No muscle quivered while the body hung there in the air. He went through the trap at

minutes and McCarthy in thirteen. The body showed no marks except the mark of the rope. His features were calm, and the smile that he wore when he met his fate was still present in death.

The warden offered to furnish the men stimulants during the last moments, but both men refused. They both exercised the nerve nature gave

Through the kindness of Deputy Warden Playford the condemned men and their friends were served with an elegant dinner Thursday. It consisted of roast beef, with thickened gravy, French fried potatoes, lamb chops, bread, butter, coffee, grapes and plum dessert with dressing. The table was decorated with flowers. The two doomed men and Craig's relatives occu-pied a little table in the reception room, and all seemed to relish the meal save

POISON IN FOOD.

In Old Times a Sharp Watch Was Kept on the Cook's Dishes.

The fear of poison which haunted the mind of every person of quality during the Middle Ages gave rise to certain curious customs, and even to certain super-stitions. When dishes are now served covered it is understood that it is merely for the purpose of keeping them warm. This was not, however, the principal rea-son why they were served covered during the Dark Ages. It was the fear that poison might be introduced into them surreptitiously between the kitchen and the table where they were to be served to the kings or lords, or even to persons of inferior rank.

The covers were not removed until the master of the house had taken his place. All dishes afterward served were brought

on the table in the same manner. It was the custom originally, when the dishes were uncovered, for some of the servants to first partake of them, but this custom was afterward in part replaced by the servants touching the food with one of several objects which were regarded as infallible preservatives against poison.

The objects were the horn of the unicorn, a serpent's tongue, the fabulous stone found in the head of a toad, serpentine, agate and other stones. The first was considered the best, but as the unicorn never existed, its horn was replaced by that of the narwhal or by a shark's tooth, which where sold by all the druggists instead of it and under its

Many persons kept a small piece of it at the bottom of their drinking glasses. Unicorn's horn was so rare and precious that it was worth more than ten times its

weight in gold. It was never proved that the stone alleged to come from the head of the toad had that origin, and the druggists that sold it knew that what they vended THE Maysville sports who placed their this did not prevent the fraud or put an end to the superstition.

At the time of Louis XIV. and Louis XV. the faith in these talismans had considerably weakened, but all the dishes editor of The Bristol Courier. placed on the royal tables were touched, as well as the plate, the napkin, the knife, the fork and the toothpick of the mon-arch, with a piece of bread, which the chief of the goblet at once swallowed.

FIRST APPELLATE DISTRICT.

The largest sample of gold quartz ever mined in Montana was taken out of the McIntyre lode. Its weight is 1,785 pounds. It came from near the surface. There are other large samples, which came from the Shafer shaft at the depth of 110 feet; one from the Musser shaft, 100 feet, and another from the working shaft, 200 feet. All are destined for ex-hibition at the World's Fair at Chicago. AT QUARANTINE.

The Cholera Situation There is No Doubt Very Grave.

An Appeal From the Cabin Passengers on the Normannia.

The Barbarism of Their Position De-nounced—The Acting Secretary of the Navy Refuses the Use of Sandy Hook as a Place of Befuge.

QUARANTINE, S. I. Sept. 9.-The cholera situation at quarantine is, no doubt, very grave. Not only are new cases breaking out every day among the steerage passengers of the ill-fated Normannia and Rugia, the former of whom are on Hoffman Island, but it has now settled well among the crew of the big express steamer, who are on board. If anything can be added to the horror of the situation, it is the fact that the cabin passengers, who have been free from any sign of the disease, are still kept, like rats in a trap, inclosed within the sides of the steamer, with cholers raging alongside them.

"No ship to put them on; no place where I can land them," says the health officer, while the agents, whose place it is to see the passengers cared for, say nothing. Dr. Jenkins has made strenuous exertions to obtain a place to put the well passengers, but up to the present he has been unsuccessful. Thursday he thought that he had every thing arranged. On his return from the lower bay, where he had been with ex-Surgeon Gen. Hamilton, to visit the site of the proposed encampment, Dr. Jenkins announced to the reporters that all ar-rangements had been made. Everything appeared to be plain sailing; but a gentleman whose friends were on the steamer had shown the correspondent of the Associated Press a telegram to Austin Corbin from Secretary Tracy, of the navy, stating that the use of Sandy Hook had been refused. On seeing Dr. Jenkins shortly after he had gone to his office and had opened his corre-spondence, he asked bim if it was true. and, after slight besitation, Dr. Jenkins handed him the telegrams

As regards the situation at lower quarantine, things are no better than on the previous day. In fact, they are much worse in regard to mortality, eleven fresh cases and four deaths being the day's record, though one of the deaths took place at a very late hour Wednesday.

The following letter, written on the Normannia on September 7, was received in this city Thursday at the office of the Evangelist, from Rev. Daniel W. Fisher, D. D., LL D., president of Han-

over college, Indiana: "On behalf of the cabta passengers of this ill-"On behalf of the cobin passengers of this ill-fated ship I appeal to you for help. We are per-fectly willing to be quarantined: but in the name of humanity and of civilization, not to speak of Christianity, let the quarantine at least be rational and not barburous. We have not been sick in the cabin except in one case, which seems to have had almost no chol-erate symptoms, and that occurred ten days ago. We have succeeded in getting the steer age away. But the craw can not be re-moved. The ship must have them aboard. One after another they sicken. Under these circumstances we scarcely dare to hope that circumstances we scarcety dare to hope that ultimately we shall escape. At any rate, been underestimated by the followers of when can such a quarantine end! Think of children, women, feeble persons, any set of ger of cholers in this fashion. The whole system is 'Anchor the ship out as far at sea as possible, and let the disease do what it can.' If any set of people were in any other situa-tion, enduring such peril as ours, millions of voices would be raised to rescue us without a day's delay. Why are we unworthy of help, situated as we are? Surely not because help is impossible. Put us on another vessel. Land us at some safe point on shore, and se-clude us to any extent. But for God's suke do not perpetuate this barbarism on us here for a

perpetuate this berous at once longer. Try to help us at once. D. W. FISHER. Yours very truly, D. W. FISHER.
"P. S - Why are we on this ship! Because the agent of the company in London assured almost every passenger who embarked at Southampton that there was no steerage this Some of us have his written statement that the ship had sailed from Hamburg without steerage."
